# JALO Interior panel

JALO interior panels are made of ash wood, with naturally strong color fluctuation in wood grain. JALO interior panels are suitable for use in wet and dry spaces. By using JALO panels can also be created rounded shapes with a minimum radius of 500 mm. The JALO panels do not have end-jointing, so they must be cut before installation. It is important to treat cut surfaces before installation to prevent cracking. Installing waste 10-20 percent.

## Ash Translucent white
