

USVA Interior panel

The USVA panels have a velvety smooth surface with microgrooves that enhance the unique characteristics of the wood, producing an impressive effect as the light changes. These contemporary panels are ideal for accent walls as well as large wall and ceiling surfaces.

USVA Interior panel

The surface of the USVA panels showcases the knots typical of authentic, natural wood. The panel's concealed fixing hides the nail head and creates a uniform surface. The panels are also end-matched, reducing material loss and enabling flexible installation. It is important to paint cut surfaces to prevent panels from cracking. The installing waste 5-10 percent.

Translucent sand
